Product Overview

Professional High-Pressure Cooking Solution

This heavy-duty high-pressure gas stove is engineered for demanding outdoor and commercial cooking environments. Constructed from robust cast iron and durable metal tubing, it ensures exceptional stability and even heat distribution through its circular burner design. It features precise flame control via an integrated brass valve, making it an ideal choice for high-demand culinary tasks.

Technical Specifications

Material	Cast Iron, Heavy-duty Metal
Model Identifier	BB-04
Burner Design	Circular burner with multi-point gas outlet holes

Control & Safety

Control Features

- Brass gas valve
- Integrated gas regulator
- High-pressure operation

Usage

Applications

Outdoor Cooking • Commercial Use • Camping
