

High-Pressure Cleaning Machine

High-pressure cleaning machines are designed for demanding cleaning tasks. Featuring robust engines, durable frames, and high-pressure pumps, these machines deliver powerful cleaning performance.

Overview

Professional Cleaning Performance

This high-pressure cleaning machine is engineered for demanding tasks, combining a robust engine with a durable frame construction. It features a high-performance pump designed to effectively remove stubborn dirt, grime, and debris from various surfaces. With adjustable nozzles and an integrated detergent injection system, this unit provides the versatility needed for professional-grade cleaning on vehicles, equipment, and large outdoor areas.

Technical Specifications

Key Performance Metrics

2500 PSI

Pressure

2.3 GPM

Flow Rate

Cleaning Features

- Adjustable nozzles
- Detergent injection system
- Robust engine design
- Durable frame construction

Applications

Suitable Surfaces

Driveways, Patios, Vehicles, Industrial Equipment
