

High-Pressure CO2 Purifier for Environmental Engineering

This high-pressure CO2 purifier is designed for environmental protection. It features a stainless steel construction with a pressure gauge and various connection ports for efficient gas purification.

Overview

High-Efficiency CO2 Purification

This high-pressure CO2 purifier is engineered for demanding environmental protection and engineering applications. It delivers exceptional gas purity of 99.99%, ensuring reliability for complex industrial processes. Designed with a robust stainless steel construction, this unit provides a compact yet powerful solution for professional engineering contractors.

Performance Metrics

Production Capacity

6 kg/h

Max Capacity

Gas Purity

99.99%

Technical Specifications

Operating Pressure

0.6 Mpa

Dimensions

650 x 450 x 1500 mm

Weight

90 kg

Application & Features

Key Features

Stainless Steel Construction, High-Pressure Rated, Integrated Pressure Gauge, Environmental Engineering Grade
