

High-Pressure Foam Cannon for Car Washing

This high-pressure foam cannon is designed for car washing and detailing. It features an adjustable spray nozzle to control foam density and spray pattern.

Overview

Professional Foam Cannon

This high-pressure foam cannon is designed for efficient car washing and detailing, capable of producing thick, clinging foam with minimal soap usage. It features a durable construction with brass fittings for enhanced chemical resistance and longevity. With an adjustable spray pattern and intake valve, it offers precise control for various cleaning applications, making it a versatile tool for professional detailers and car enthusiasts alike.

Performance Metrics

Maximum Pressure

3200 PSI
Max Pressure

1.2 MPA
Max Pressure

Maximum Temperature

140 °F

Capacity & Usage

Bottle Capacity

1 L

Soap Usage per Wash

4-6 ounces

Features

Adjustable Settings

- Adjustable intake valve for soap concentration
- Adjustable spray pattern nozzle
