

High Pressure Fuel Injector Hose

This high-pressure fuel injector hose is designed for automotive fuel injection systems. It is constructed with reinforced materials to withstand high pressure and prevent fuel leakage.

Product Overview

High-Performance Fuel Delivery

This high-pressure fuel injector hose is engineered specifically for the demanding environments of modern automotive fuel injection systems. Constructed with reinforced materials, it provides exceptional durability and resistance to high internal pressures, ensuring consistent fuel delivery while preventing leaks. Designed for reliability, this component is suitable for a wide range of automotive applications requiring robust, high-pressure fluid transfer.

Technical Specifications

Dimensions

7 mm

Inner Diameter

14 mm

Outer Diameter

Application Compatibility

Automotive, Fuel Injection Systems, High Pressure Lines

Vehicle Compatibility

Supported Car Series

Region	Examples
Japanese	Honda, Toyota, Nissan, Mazda, Mitsubishi, Isuzu, Subaru, Suzuki
European	Audi, Skoda, Benz, BMW, Peugeot, Fiat, Volkswagen, Renault, Opel, Volvo, Citroen
American	Ford, Buick, Chrysler, Jeep, Chevrolet, GM, Dodge
Korean	Kia, Hyundai, Daewoo

Service & Quality

Quality Standards

IATF 16949 Certified

Available Services

- OEM Service
- ODM Service
- Customized Packing
- Production based on samples
- Production based on drawings
