

High-Pressure Hydraulic Hose

This high-pressure hydraulic hose is engineered for demanding applications requiring robust fluid transfer. Constructed with multiple layers of reinforced materials, it withstands high pressures and extreme temperatures.

Product Overview

High-Pressure Hydraulic Hose

This industrial-grade hydraulic hose is engineered for demanding high-pressure fluid transfer applications in heavy machinery and industrial systems. Featuring a multi-layered reinforced structure, it offers superior durability, abrasion resistance, and reliable performance in extreme operating conditions. It is compatible with a wide range of hydraulic fluids, including hydraulic oil, fuel oil, lubricants, emulsions, glycol, and water.

Technical Specifications

Standard Temperature Range

-40 C
Min Temp

120 C
Max Temp

Available Series

R1, R2, 1SN, 2SN, 4SP, 4SH, R9, R10, R12, R13, R15

Cold Resistant Variant

-55 C

Standards & Compliance

Certified Standards

- GB/T10544-2003
- MT/T98-2006

Certification Codes

XK13-022-00082 • MEE100510

Performance Metrics

Working Pressure (4SH-19)

42 MPa

Size (4SH-19)

3/4 inch
