

High-Pressure Hydraulic Hose for Machinery

This high-pressure hydraulic hose is designed for demanding applications. It is constructed with multiple layers of reinforcement for strength and abrasion resistance.

Product Overview

High-Performance Hydraulic Hose Solutions

This high-pressure hydraulic hose is engineered for demanding industrial and agricultural applications, offering superior strength and durability. Constructed with a synthetic rubber tube and multiple layers of high-tensile steel wire reinforcement, it ensures reliable performance under extreme conditions. The hose is compatible with a wide range of fluids including hydraulic oil, fuel oil, lubricants, and water-based emulsions.

Technical Specifications

Standard Operating Temperature

-40 °C
Min Temp

120 °C
Max Temp

Available Series

R1, R2, 1SN, 2SN, 4SP, 4SH, R9, R10, R12, R13, R15

Cold Resistant Variant

Yes

Cold Resistant Min Temp

-55 °C

Compatibility

Supported Fluids

- Hydraulic oil
- Fuel oil
- Lubricants
- Emulsion
- Glycol
- Water
