

High-Pressure Hydraulic Hose for Mining Machinery

This high-pressure hydraulic hose is designed for demanding applications, including use in mining machinery. It is constructed with robust materials to withstand extreme pressures and harsh environments.

Product Overview

High-Pressure Hydraulic Hose

Engineered for durability and reliability, these high-pressure hydraulic hoses are designed for demanding applications in mining machinery, excavators, and drilling equipment. They provide optimal performance in critical hydraulic systems by withstanding extreme pressures and harsh environmental conditions. The construction utilizes robust materials to ensure longevity and safety during heavy-duty fluid transfer.

Technical Specifications

Operating Temperature

-40 °C
Min Temp

120 °C
Max Temp

Compatible Fluids

Hydraulic Oil, Fuel Oil, Lubricants, Emulsion, Glycol, Water

Cold Resistant Version

Yes

Product Range

Available Series

- R1
- R2
- 1SN
- 2SN
- 4SP
- 4SH
- R9
- R10
- R12
- R13
- R15

Compliance & Standards

Standards

GB/T3683-2011

Pressure Rating

50 MPa
