Product Overview

High-Pressure Hydraulic Hose Solutions

These high-pressure hydraulic hoses are engineered for demanding industrial and agricultural applications. Designed to handle a wide range of fluids including hydraulic oil, fuel, lubricants, and emulsions, they offer robust performance in harsh environments. The construction ensures durability and reliability for critical fluid transfer systems.

Technical Specifications

Operating Temperature

-40 C
Min Temp

120 C
Max Temp

Compatible Fluids	Hydraulic Oil, Fuel Oil, Lubricants, Emulsion, Glycol, Water
Cold Resistant Variant	Yes
Cold Resistant Min Temp	-55 C

Standards & Compliance

Compliance Standards

- GB/T3683-2011
- MT/T98-2006

Product Range

Available Hose Series

R1 • R2 • 1SN • 2SN • 4SP • 4SH • R9 • R10 • R12 • R13 • R15
