

High-Pressure Hydraulic Rubber Hose

This high-pressure rubber hose is engineered for demanding applications such as hydraulic systems and fluid transfer. It features a multi-layer construction with steel wire or textile reinforcement and synthetic rubber compounds.

Product Overview

Professional Hydraulic Fluid Conveyance

This high-pressure hydraulic rubber hose is engineered for demanding industrial and construction environments. Featuring a robust multi-layer construction with high-tensile steel wire reinforcement, it offers superior durability, flexibility, and resistance to abrasion, oil, and ozone. Designed for reliable performance, it ensures seamless fluid transfer in various heavy-duty hydraulic systems and machinery.

Technical Specifications

Fluid Compatibility

- Hydraulic oil
- Fuel oil
- Lubricants
- Emulsion
- Glycol
- Water

Custom Capabilities

Cold Resistant (-55 C)

Supported Standards

R1, R2, 1SN, 2SN, 4SP, 4SH, R9, R10, R12, R13, R15

Minimum Operating Temperature

-40 C

Maximum Operating Temperature

120 C
