

# High-Pressure Injection Machine

This high-pressure injection machine is designed for injecting materials into structures. It features an 850W motor operating at 220V/60Hz, delivering an output pressure of 12000psi with a restarting pressure below 7500psi.

## ADDITIONAL IMAGES

## Product Overview

### High-Pressure Injection System

This high-pressure injection machine is engineered for professional structural repair and sealing applications. It is compatible with a variety of materials, including water-soluble and oil-soluble PU foam plugging agents, epoxy resins, and acrylic resin infusion materials. Featuring a robust motor and adjustable pressure controls, it provides the reliability needed for demanding construction environments.

## Technical Specifications

Motor Power	800 W
Voltage	220 V
Frequency	50 Hz
Output Pressure	12000 psi
Restarting Pressure	8000 psi
Max Particle Size	0-2mm

## Physical Properties

Net Weight	7 kg
Key Features	Adjustable Pressure Gauge, Relief Valve, Low Viscosity Compatible

## Accessories

### Included Accessories

- High-pressure hose
- Switch valve (with butter head)
- Filter
- Spare parts kit
- Hand tool kit

## Logistics

### Packaging Details

Configuration	Dimensions	Weight
Single Unit	43 x 15 x 39 cm	7 kg
3pcs/Carton	48 x 45 x 40.5 cm	27/24 kg
