

High-Pressure Power Sprayer

This high-pressure sprayer is designed for various applications. It features a robust construction with brass components, a stainless-steel pressure tank and adjustable valves.

Product Overview

High-Performance Pressure Sprayer

This high-pressure power sprayer is engineered for demanding agricultural, industrial, and cleaning applications. Featuring a robust construction with durable brass components and a stainless-steel pressure tank, it ensures reliability under heavy workloads. Its adjustable pressure and flow controls, coupled with a stable mounting base, provide precision and ease of use for professional operators.

Technical Specifications

Suction Volume

13.5 L/min
Min Suction

20 L/min
Max Suction

Plunger Configuration	3 plungers, 22mm diameter, 16mm stroke
Operating Pressure	40 bar
Motor Power Range	4 - 5.5 HP
Operating Speed	800 - 1200 rpm

Physical Characteristics

Net Weight	7.5 kg
Key Features	Brass components, Stainless-steel tank, Pressure gauge included, Adjustable flow valve, Stable metal base
