

# High-Pressure Power Sprayer for Agriculture

This high-pressure power sprayer is designed for industrial and agricultural applications. It is suitable for spraying pesticides, herbicides, cleaning equipment, and other tasks requiring high pressure and volume.

## Product Overview

### High-Pressure Power Sprayer

This high-pressure power sprayer is engineered for demanding industrial and agricultural applications. Featuring a robust construction with a durable brass pump head, it is built for extended service life and reliable performance. It is an ideal solution for tasks requiring high pressure and volume, such as applying pesticides and herbicides or cleaning heavy equipment.

## Technical Specifications

Pump Head Material	Brass
Suitable Applications	Agriculture, Industrial Cleaning, Pesticide Application, Herbicide Application
Maintenance	Easy maintenance design

## Product Status
