

High-Pressure Power Sprayer for Agriculture and Industry

This high-pressure power sprayer is designed for agricultural spraying, cleaning, and industrial applications. It features a robust pump, pressure regulator, and compact design for reliable and efficient spraying.

Product Overview

High-Performance Spraying Solution

This high-pressure power sprayer is engineered for versatile applications, ranging from agricultural crop care to demanding industrial cleaning tasks. Built with a robust pump mechanism, it ensures consistent performance and long-term durability in challenging environments. The unit features precise output control through an integrated pressure regulator and gauge, allowing operators to tailor the spray pattern to specific needs using various compatible nozzles.

Technical Specifications

Control Features

- Integrated pressure regulator
- Pressure gauge for precise monitoring
- Compatible with various nozzles and accessories

Primary Applications

Agriculture, Industrial Cleaning, General Spraying

Design & Construction

Design Highlights

Compact Design • Durable Construction • Portable
