

High Pressure Refrigerated Air Dryer for PET Industry

This high-pressure refrigerated air dryer is designed for the PET industry. It removes moisture from compressed air to ensure a consistent supply of dry air for PET bottle manufacturing and other high-pressure applications.

Overview

High-Performance Drying for PET Manufacturing

This high-pressure refrigerated air dryer is engineered specifically to meet the rigorous demands of the PET industry. By efficiently removing moisture from compressed air, it ensures a consistent supply of high-quality, dry air essential for bottle manufacturing and other high-pressure applications. The unit features a robust design with precise monitoring capabilities, providing reliable performance and longevity in demanding industrial environments.

Technical Specifications

Monitoring & Control

- Air Pressure Gauge
- EVA Pressure Gauge
- Power Status Indicator
- Running Status Indicator
- Start/Stop Controls

Build Quality

Robust Construction • High-Pressure Rated • Reliable Refrigeration System

Primary Application

PET Industry, High-Pressure Systems, Pneumatic Equipment
