

# High Pressure Sodium Gas Discharge Lamp

This high pressure sodium lamp provides excellent light transmittance. Constructed from durable materials, it offers high luminous efficiency and stable performance.

## ADDITIONAL IMAGES

## Product Overview

### High-Pressure Sodium Gas Discharge Lamp

This high-pressure sodium gas discharge lamp is engineered with durable materials and superior light transmittance for professional lighting applications. Designed for high luminous efficiency and energy savings, it offers a long service life and strong fog penetration capabilities. Ideal for large-scale infrastructure, this lamp is suitable for roads, highways, airports, docks, stations, and public squares.

## Technical Specifications

### Available Wattages

- 50
- 70
- 100
- 250
- 400
- 1000

### Maximum Luminous Flux

**130000 LM**

Max Light Output

### Service Life

24000 hours

## Features & Benefits

### Key Features

High Luminous Efficiency, Low Power Consumption, Strong Fog Permeability, No Insect Attraction, Energy-Saving

## Application

### Recommended Applications

Roads • Highways • Airports • Docks • Stations • Squares
