

High-Pressure Sodium Lamp for Industrial and Agricultural Lighting

This high-pressure sodium lamp offers excellent high lumen output. It is suitable for agricultural, industrial, and street road lighting.

Product Overview

High-Efficiency Lighting Solution

This high-pressure sodium (HPS) lamp is engineered for superior luminous efficacy, making it an ideal choice for demanding environments. Its robust construction ensures reliable performance in industrial settings, street lighting, and agricultural applications. Designed for longevity and cost-effectiveness, this lamp delivers consistent light output to meet professional lighting requirements.

Key Features

Performance Metrics

1 High

Lumen Output

Suitable Applications

Industrial Lighting, Agricultural Lighting, Street Lighting, Road Lighting

Technical Specifications

Construction

- Clear outer bulb
- Robust design
- High-efficacy gas-discharge arc tube

Lamp Technology

High-Pressure Sodium (HPS) Gas-Discharge
