

High-Pressure Steel Flange ANSI B16.47

This high-pressure steel flange is manufactured to ANSI B16.47 standards. It is designed for connecting pipes, valves, pumps, and other equipment in piping systems.

Product Overview

High-Pressure Steel Flange ANSI B16.47

This high-pressure steel flange is precision-engineered to meet the rigorous ANSI B16.47 standards, ensuring reliability in demanding industrial environments. Designed with a raised face and robust bolt hole configuration, it provides a secure, leak-resistant connection for pipes, valves, and pumps. Its durable construction makes it an ideal solution for critical infrastructure in sectors such as oil and gas, chemical processing, and water treatment.

Technical Specifications

Primary Usage

- Pipe connection
- Valve integration
- Pump system assembly
- General industrial piping

Standard	ANSI B16.47
Face Type	Raised Face (RF)
Suitable Industries	Oil and Gas, Chemical Processing, Water Treatment
