

# High-Pressure Triplex Plunger Pump, 1600 PSI

This high-pressure triplex plunger pump is designed for demanding industrial applications. It features robust construction, a maximum pressure of 1600 PSI, and a direct drive configuration.

## Overview

### High-Performance Industrial Pumping

The 3WZ-1600D is a high-pressure triplex plunger pump engineered for demanding industrial cleaning and fluid transfer applications. Featuring a robust, compact construction, this unit is designed for reliable power transmission via a direct drive configuration. Its precision-engineered plungers and seals ensure minimized leakage and maximized operational efficiency in harsh environments.

## Performance Specifications

### Maximum Pressure

**1600 PSI**

Max Pressure

## Design & Construction

### Key Design Features

- Robust industrial construction
- Compact footprint for easy integration
- Precision-engineered plungers
- High-durability seals

Pump Type	Triplex Plunger Pump
-----------	----------------------

Drive Configuration	Direct Drive
---------------------	--------------

## Applications

Suitable Applications	Pressure Washing, Industrial Cleaning, Fluid Transfer
-----------------------	---
