

High-Pressure Triplex Plunger Pump with Direct Drive

This high-pressure triplex plunger pump is designed for demanding applications. It features a direct drive C-face motor mount, durable brass manifold, ceramic plungers, and integrated unloader valve for pressure regulation and bypass.

Product Overview

High-Pressure Triplex Plunger Pump

This high-pressure triplex plunger pump is engineered for demanding industrial applications. It features a direct drive C-face motor mount for efficient power transmission. Built with a durable brass manifold and ceramic plungers, it is designed for reliability in industrial cleaning, pressure washing, and fluid transfer systems.

Technical Specifications

Drive System	Direct Drive (C-Face Motor Mount)
Pump Configuration	Triplex Plunger

Construction

Manifold Material	Brass
Plunger Material	Ceramic

Features

Integrated Components	Unloader Valve, Pressure Regulator, Bypass System
-----------------------	---

Applications

Recommended Use Cases

- Industrial cleaning
- Pressure washing
- Fluid transfer systems
