

High-Pressure Tubing Coupling

This high-strength tubing coupling connects sections of tubing in mining and industrial applications. Precision-machined threads ensure a secure, leak-proof connection in high-pressure and corrosive environments.

Product Overview

High-Pressure Tubing Coupling

This high-strength tubing coupling is engineered for demanding mining and industrial environments, providing a secure and leak-proof connection for various tubing systems. Featuring precision-machined threads, it ensures reliable performance and excellent resistance to high pressure and corrosive conditions. Its robust design is built for durability, offering an extended service life in both fluid and gas transfer applications.

Technical Specifications

Material Grades

- J55
- K55
- N80(1)
- N80(Q)
- L80(1)
- L80(13Cr)
- T95
- P110

Available Sizes

1.9" to 4-1/2"

Thread Standards

EU, NU
