

High Pressure Washer

High pressure washers deliver powerful cleaning performance for various applications. Models offer varying maximum pressures and flow rates.

Overview

Professional High Pressure Cleaning Solutions

This range of high-pressure washers is engineered for demanding cleaning tasks, offering robust performance with various pressure and flow rate configurations. Designed for durability and efficiency, these units feature reliable engine models ranging from 2.6 HP to 13 HP, ensuring consistent power for professional applications. Whether for light-duty maintenance or heavy-duty industrial cleaning, these machines provide the versatility and reliability required by B2B buyers.

Performance Specifications

High Pressure Washer Performance Matrix

Model	Max Pressure (bar)	Rated Flow (L/min)	Power (HP)	Engine
15G27-7	186	14.4	7	SU210
15032-9	220	14.4	9	SU270
15036-13	248	18	13	SU390
18036-13	248	20.7	13	SU390
15028-7	193	14.4	7	SU178F
15036-10	248	18	10	SU186FA
18035-10	240	20.7	10	SU186FA

Compact Series Performance

112 bar
Min Pressure

3400 rpm
Engine Speed

17.5 kg
Min Weight

Water Pump Specifications

Water Pump Technical Data

Model	Outlet/Inlet (mm)	Displacement (m ³ /h)	Lift Max (m)	Power (HP)
SNB25A	25/25	7	22	1.5
SNB40A	40/40	21	20	2
SNB50	50/50	27	30	5.5-6.5
SNB80	80/80	60	30	5.5-6.5
SNB100	100/100	80	25	9-13
SNB150	150/150	180	20	13-15

Technical Features

Supported Engine Types

SU154, SU160, SU168, SU200, SU210, SU390, SU420, 170F, 178F, 186FA, 192F
