Product Overview

Professional Cleaning Performance

This high-pressure washer is engineered for versatile cleaning tasks, effectively removing grime and debris from various outdoor surfaces. It features a robust design with a wheeled frame for excellent portability and is equipped with adjustable spray nozzles to suit different pressure requirements. Built for both residential and commercial applications, it includes integrated safety systems like thermal relief valves and low oil shut-off protection for reliable, long-term operation.

Technical Specifications

Maximum Pressure

3200 psi

Rated Pressure

22 MPa

Rated Pressure

Max Water Temperature

80 °C

Features

Design Highlights

- Wheeled frame for maneuverability
- Integrated detergent tank
- Adjustable spray nozzles
- High-pressure hose included

Safety Systems

Thermal Relief Valve, Low Oil Shut-Off

Application

Recommended Use

Residential • Commercial • Driveways • Decks
