Product Overview

High-Efficiency Pressure Washer Series

This range of high-pressure washers is engineered for durability and high-power output, featuring full aluminium pumps for stable performance. With an integrated Total Stop System, the unit automatically shuts off the pump when the trigger is released, optimizing energy efficiency and extending component lifespan. Designed for professional ease-of-use, these washers include a telescopic handle, large wheels, and an on-board detergent tank to handle a variety of heavy-duty cleaning tasks.
