

High-Pressure Washer with Spray Gun

This high-pressure washer is designed for various cleaning tasks. It features a durable yellow housing, a pressure gauge for monitoring output, and multiple connection points for hoses and accessories.

Product Overview

Professional Cleaning Performance

The HPI-K1200 high-pressure washer is engineered for versatility and durability in demanding cleaning environments. Featuring a robust yellow housing and an integrated pressure gauge, it allows operators to monitor performance with precision. The unit includes a specialized spray gun and lance system, making it an ideal solution for targeted cleaning tasks, while the compact design and ergonomic handle ensure excellent portability.
