

# High Pressure Water Inlet Hose

This high-pressure inlet hose connects water sources to machinery. It is constructed with durable materials to withstand high water pressure and ensures a reliable water supply.

## Product Overview

### High-Pressure Inlet Hose (Model IH1M)

The IH1M High-Pressure Inlet Hose is engineered for reliable water delivery in industrial and general machinery applications. Designed to withstand demanding pressure environments, this hose features high-quality, corrosion-resistant fittings that ensure secure, leak-proof connections. Its flexible construction allows for easy installation and maneuverability, even in tight or confined spaces.

## Technical Specifications

Model Number	IH1M
Product Type	High Pressure Inlet Hose

## Key Features

Key Attributes	High Pressure Rated, Corrosion Resistant, Flexible Design, Leak-Proof Fittings
