Overview

Professional Drain Cleaning Power

This high-pressure water jetting machine is engineered for heavy-duty drain line cleaning, capable of servicing pipes ranging from 50mm to 200mm in diameter. Powered by a robust 15HP gasoline engine, it delivers 3000 psi of working pressure for efficient removal of stubborn blockages. The unit includes a pulse feature to navigate tight bends and traps, along with a foot pedal for enhanced operator safety during use.

Engine Power

Technical Specifications

Operating Range	50-200mm (2" to 8") drain lines
Maximum Hose Length	60 m
Total Machine Weight	115 kg

Equipment & Accessories

Standard Kit Components

- Foot Pedal
- Hose Reel
- Jet Hose (9.5mm x 60m)
- 30° Propulsion Nozzle
- 15° Penetrating Nozzle
- Cleaning Lance with Brass Turbo Nozzle
