

High-Pressure Water Pump

This high-pressure water pump is designed for efficient water transfer and boosting. It features durable construction with a stainless steel pump body and a powerful motor for reliable performance.

Overview

High-Pressure Water Pump Performance

This high-pressure water pump is engineered for efficient water transfer and reliable pressure boosting. Featuring a durable stainless steel pump body and a powerful motor, it is built to withstand demanding environments. It is a versatile solution suitable for a wide range of applications, including agricultural irrigation, domestic water supply systems, and various industrial processes.

Technical Specifications

Suitable Applications

- Water transfer
- Pressure boosting
- Irrigation
- Domestic water supply
- Industrial processes

Pump Type	JET pump (JDT series)
Construction Material	Stainless Steel Body

Performance Features

Key Benefits

High Pressure • Durable Construction • Consistent Flow • Compact Design
