

High Rate Nickel-Cadmium Rechargeable Batteries

High-rate nickel-cadmium (Ni-Cd) batteries are rechargeable and come in multiple sizes. The batteries are suitable for devices needing a consistent power source.

Product Overview

High Rate Nickel-Cadmium Rechargeable Batteries

These high-rate Nickel-Cadmium (Ni-Cd) rechargeable batteries are engineered to provide a reliable and consistent power source for demanding electronic devices. Available in a variety of standard sizes including AAA, AA, C, and D, they offer versatile energy solutions for professional applications. With options for both standard and rapid charging, these batteries are designed to support efficient power management in various operational environments.

Technical Specifications

Available Sizes	AAA, AA, C, D
Nominal Voltage	1.2 V

Performance Metrics

Capacity by Size

500 mAh

AAA Capacity

1000 mAh

AA Capacity

3500 mAh

C Capacity

5000 mAh

D Capacity

Charging Information

Charging Profiles

Battery Type	Standard Charge	Rapid Charge
AAA	16 hours @ 90mAh	N/A
C	16 hours @ 90mAh	4 hours @ 300mAh
