

High-Rise Residential Apartment Complex

This high-rise apartment complex features multiple towers designed for residential living. The buildings have a modern architectural design with blue-tinted glass windows and white facade elements.

Project Overview

High-Rise Residential Development

This eighteen-floor residential apartment complex represents a significant urban development project completed in late 2008. The structure encompasses a total construction area of 16,000 square meters, designed to meet modern residential standards. The scope of the project included the complete main structure, exterior walling, and internal wall painting, delivering a ready-to-occupy urban living space.
