

High-Shear Food and Beverage Mixer

This high-shear mixer is designed for food, beverage, and cereal processing. It features stainless steel construction and a variable-speed motor for precise mixing.

Overview

High-Performance Mixing Solution

This high-shear mixer is engineered specifically for the rigorous demands of food, beverage, and cereal processing. Constructed with high-grade stainless steel, it ensures optimal hygiene standards and long-term corrosion resistance. The integrated variable-speed motor and intuitive control panel allow for precise blending, emulsifying, and homogenizing, making it a versatile asset for diverse production lines.

Technical Specifications

Industry Suitability

Food Processing • Beverage Production • Cereal Processing

Material	Stainless Steel
Control System	Variable-speed motor with control panel
Primary Applications	Blending, Emulsifying, Homogenizing

Design & Stability

Operational Benefits

- Hygiene-focused stainless steel construction
- Corrosion resistant materials
- Precision control for consistent output
- High-shear mixing capability

Mounting	Sturdy base mounted
