

High Speed Computerized Lockstitch Sewing Machine

This is a high-speed computerized lockstitch sewing machine. It is designed for precise and efficient stitching with computerized controls for pattern selection and speed adjustment.

Overview

High-Speed Industrial Performance

The LS 8700-D2 is a high-speed computerized lockstitch sewing machine engineered for professional apparel and textile manufacturing environments. It features advanced computerized controls that allow for precise pattern selection and seamless speed adjustment, ensuring consistent stitch quality across various fabrics. Designed to enhance productivity in industrial settings, this machine provides the reliability and efficiency required for high-volume sewing operations.

Technical Specifications

Model Number	LS 8700-D2
Machine Type	Computerized Lockstitch
Application	Apparel Manufacturing, Textile Manufacturing, Industrial Sewing

Features

Key Capabilities

- Computerized pattern selection
- Adjustable speed control
- High-speed operation
- Consistent stitch quality
