

# High-Speed Currency Counter with Counterfeit Detection

This high-speed currency counter is designed for accurate and efficient money counting. It features counterfeit detection, batch counting, and add functions for use in banks, retail, and high-volume cash environments.

## Product Overview

### Professional Currency Handling Solution

This high-speed currency counter is engineered for high-volume cash handling environments, including banks and large retail operations. It combines rapid counting speeds with advanced multi-sensor counterfeit detection to ensure accuracy and operational efficiency. The user-friendly interface and large hopper capacity are designed to streamline cash management workflows while significantly reducing manual counting errors.

## Performance & Capabilities

### Operational Modes

- Batch Counting
- Add Function
- High-Speed Counting

### Detection Technologies

UV, MG, IR

## Design & Usability

### Hopper Capacity

Large Capacity

### User Interface

User-friendly digital interface
