

High-Speed Die Grinder

This high-speed die grinder is designed for precision grinding, polishing, and shaping. It features a compact and ergonomic design for comfortable handling and control.

Product Overview

High-Speed Die Grinder S1J-TM01-10

This high-speed die grinder is designed for precision grinding, polishing, and shaping tasks across various materials. With a compact and ergonomic design, it ensures comfortable handling and precise control during detailed work. The tool features a powerful motor and variable speed control, making it a versatile solution for metalworking, woodworking, and intricate finishing applications.

Technical Specifications

Rated Voltage	220 V
Rated Frequency	50 Hz
Rated Power	130 W
No-Load Speed	8000-30000 r/min

Compliance & Standards

Executive Standards

- GB/T 3883.1-2014
- GB/T 3883.202-2017

Key Features

Suitable Applications	Metalworking, Woodworking, Polishing, Precision Grinding, Shaping
