

High-Speed Direct Drive Flatbed Interlock Sewing Machine with Auto Thread Cutting

This high-speed, direct-drive flatbed interlock sewing machine features automatic thread cutting. It is designed for efficient and precise sewing operations, enhancing productivity and reducing manual labor.

Overview

High-Performance Sewing Solution

This high-speed, direct-drive flatbed interlock sewing machine is engineered for efficiency and precision in professional textile environments. Equipped with an automatic thread cutting mechanism, it significantly enhances productivity by reducing manual intervention during high-volume production. The direct-drive system ensures smooth, quiet operation, making it a reliable choice for various apparel and industrial sewing applications.

Technical Specifications

Machine Type	Flatbed Interlock Sewing Machine
Drive System	Direct Drive
Automation Features	Automatic Thread Cutting
