

High-Speed Direct Drive Sewing Machine

This high-speed direct drive sewing machine is designed for efficient and precise stitching. It features a direct drive motor for reduced noise and vibration, ensuring smooth operation.

Overview

High-Performance Industrial Sewing

This high-speed direct drive sewing machine is engineered for maximum efficiency and precision in industrial environments. Featuring a direct drive motor, it significantly reduces noise and vibration levels while ensuring smooth, reliable operation. The integrated control panel allows operators to easily adjust critical sewing parameters like speed and stitch length, making it a versatile solution for a wide range of fabric applications.

Technical Specifications

Adjustable Parameters

- Sewing Speed
- Stitch Length

Construction

Robust • Durable • High Productivity

Drive System

Direct Drive Motor

Key Features

Low Noise, Reduced Vibration, Integrated Control Panel, Industrial Grade
