

High-Speed Double-Deck Electric Trainset

This double-deck trainset is designed for high-speed passenger transport on electrified lines. It features advanced braking systems and comfortable passenger compartments.

Overview

High-Speed Double-Deck Trainset

The XD-8008 is a high-speed double-deck electric trainset engineered for efficient, long-distance passenger transport. Featuring an aerodynamic front-end design and a distinctive red stripe, this trainset combines modern aesthetics with robust performance. It is specifically designed for operation on electrified railway lines, ensuring reliable and comfortable travel for passengers.

Technical Specifications

Model Designation	XD-8008
Power Source	Electric
Configuration	Double-deck

Key Features

Safety & Comfort

- Advanced braking systems
- Comfortable passenger compartments

Design Highlights

Aerodynamic Front-end, Double-deck Capacity, Electrified Line Compatible
