

High-Speed Fiber Gilling Machine

This high-speed gilling machine efficiently processes fibers. It aligns and blends them to create slivers suitable for spinning processes.

Product Overview

High-Speed Gilling Machinery

The PDIII Model High-speed Gilling Machinery is a specialized piece of equipment designed for the apparel and textile industry. It is engineered to efficiently process fibers, aligning and blending them to create slivers suitable for subsequent spinning processes. The machine operates at high speeds to maximize productivity while maintaining consistent sliver quality.

Gilling Machine Specifications

PD Series Performance Table

Model	Faller Drops (t/min)	Drawing Times	Coiling No.
PDIII-1C	1000-1600	5-12	1 pc
PDIII-1CR	1000-1600	5-12	N/A
PDIII-2C	1000-1600	5-12	2 pcs

Evenness Range d17% (pun silk)
