

High-Speed Flatbed Sewing Machine

This high-speed flatbed sewing machine is designed for sewing thin to moderately thick materials, including cotton, wool, chemical fibers, and lightweight leather. It features a fully automatic lubrication system and uses standard domestic parts for easy maintenance.

Product Overview

High-Speed Flatbed Sewing Machine

This high-speed flatbed sewing machine is engineered for efficiency in industrial sewing environments. It is perfectly suited for processing thin to moderately thick materials including cotton, wool, chemical fibers, and lightweight leather. With an optimized structure and automatic lubrication system, it ensures reliable, smooth operation while preventing fabric contamination.

Technical Performance

Maximum Sewing Speed

5000 RPM

Max Speed

Maximum Stitch Length	4 mm
Presser Foot Lift Height	6-13mm
Needle System	DBx1 9-14

Power and Maintenance

Motor Power	250 W
Lubrication System	Fully Automatic, Oil Volume Control Valve, Non-contaminating

Industry Applications

Ideal For

- Garment manufacturing
- Cap manufacturing
- Shoe manufacturing
