

High-Speed Four-Thread Overlock Sewing Machine with Pressure Trimmer

This overlock sewing machine features automatic thread trimming upon operation completion. Designed for industrial use, it ensures durability and consistent performance with adjustable differential feed to prevent fabric puckering or stretching.

Product Overview

High-Speed Industrial Overlock Solution

This super high-speed four-thread overlock sewing machine is engineered for efficient and precise edge finishing in high-volume production environments. Featuring a robust industrial construction, it ensures long-term durability and consistent output quality. The integrated pressure trimmer provides clean, professional edges, while the adjustable differential feed system prevents fabric puckering or stretching for superior results.

Technical Specifications

Thread Count	4 threads
Key Features	Pressure Trimmer, Adjustable Differential Feed, Industrial Grade, High-Speed Operation

Performance
