

High-Speed Industrial Material Mixer

This high-speed mixer features a stainless steel mixing chamber and a conical hopper for easy material loading. It is equipped with a powerful electric motor and a discharge chute for controlled material output.

Product Overview

High-Speed Industrial Material Mixer

This high-speed industrial mixer is engineered for versatile material processing, including mixing, stirring, drying, and coloring. It is suitable for a wide range of applications across the plastics, rubber, and daily chemical industries. The system features advanced temperature control for discharging, offering both automatic and manual modes to suit specific operational requirements.

Operational Features

Discharge Control

- Automatic temperature control
- Manual control

Process Functions

Mixing, Stirring, Drying, Coloring

Design & Construction

Stability & Noise Reduction

Robust Base • Vibration Dampeners

Chamber Material

Stainless Steel

Loading System

Conical Hopper

Industry Applications

Suitable Industries

- Plastics
- Rubber
- Daily Chemicals
