

High Speed Injection Mold for Thin-Walled Products

This high-speed injection mold is designed for producing thin-walled plastic containers. It is suitable for food packaging and other applications requiring precision and efficiency.

Product Overview

High-Speed Thin-Walled Injection Molding Solution

This high-speed injection mold is engineered specifically for the rapid production of high-precision, thin-walled plastic containers. Its design optimizes cycle times and material distribution, making it an ideal choice for manufacturing food-grade packaging such as cups, tubs, and specialized storage boxes. Built for efficiency and durability, this mold ensures consistent wall thickness and structural integrity in high-volume production environments.

Technical Specifications

Compatible Mold Variations

- Thin cup mold
- Thin box mold
- Thin big box mold

Key Applications

Food Packaging, Thin-walled Containers, High-Speed Manufacturing, Precision Molding
