

High Speed Interlock Sewing Machine for Tape Binding

This high-speed interlock sewing machine is engineered for tape-binding applications. It delivers efficient and precise stitching, increasing productivity in apparel and textile manufacturing.

Overview

High-Speed Precision for Tape Binding

The LS31016-03DB is a high-speed interlock sewing machine specifically engineered for tape-binding applications in industrial textile manufacturing. Designed for both efficiency and precision, this machine delivers a durable, professional finish suitable for a wide variety of fabrics and garment types. Its robust construction ensures reliable, long-lasting performance even in demanding production environments.

Technical Specifications

Model Number	LS31016-03DB
Primary Application	Tape-binding
Machine Type	Interlock Sewing Machine

Performance

Key Performance Features

- High-speed operation
- Precision tape-binding capability
- Durable interlock stitch finish
- Robust industrial construction
