

High-Speed Lockstitch Sewing Machine

This high-speed lockstitch sewing machine is designed for sewing various thicknesses of materials including knitting, cotton, leather, and chemical fibers. It features a reversed level feed system and an automatic lubrication system.

Overview

High-Speed Lockstitch Efficiency

The GC28 series is a versatile, high-speed single-needle lockstitch sewing machine engineered for professional garment production. Featuring a reliable reversed level feed system and an advanced automatic lubrication mechanism, it ensures consistent stitch quality across various fabric types. Whether handling delicate knits, standard cottons, or heavy-duty leather and chemical fibers, this series offers specialized models to meet diverse material thickness requirements.

Key Performance Metrics

Speed Capabilities

5000 s.p.m

Max Speed (Medium)

4000 s.p.m

Max Speed (Light)

3000 s.p.m

Max Speed (Heavy)

Supported Materials

Knitting, Cotton, Leather, Chemical Fiber

Technical Specifications

Model Specifications

Model	Material Type	Max Speed	Needle Type	Thickness Range
GC28-1A/3	Medium	5000	DBx1 #14	Standard
GC28-1AB/3B	Light	4000	DBx1 #11	0-4mm
GC28-1AH/3H/P/S	Heavy	3000	DBx1 #18/#22	0-7mm

Lubrication Automatic supply and return lubrication system

Feed System Reversed level feed system
