

High Speed Lockstitch Sewing Machine

This is a high-speed, single-needle flatbed lockstitch sewing machine. It is designed for efficient and precise stitching, suitable for various apparel and textile applications.

Overview

High-Speed Lockstitch Performance

This high-speed single-needle flatbed lockstitch sewing machine is engineered for maximum efficiency and precision in industrial textile environments. Designed to handle various apparel applications, it delivers consistent stitch quality and robust durability for demanding production lines. The machine features advanced mechanisms to ensure smooth operation, significantly enhancing overall productivity for professional sewing workflows.

Key Features

Performance Highlights

1 count

Needle Count

Machine Configuration	Single-Needle Flatbed
Primary Application	Apparel, Textile Production, Industrial Sewing

Safety and Compliance

Safety Warnings

- Keep hands clear of needle during operation
- Exercise caution during threading
- Avoid moving parts during maintenance
