

High-Speed Lockstitch Sewing Machine for Medium-Weight Fabrics

This high-speed lockstitch sewing machine is designed for sewing medium-thickness materials, including cotton, leather, and knits. It features automatic lubrication and a reversed level feed system.

Overview

High-Speed Lockstitch Performance

This high-speed, single-needle lockstitch sewing machine is engineered for versatility and reliability when working with medium-thickness materials. Featuring a robust reversed level feed system and an automatic lubrication mechanism, it ensures consistent performance across various fabrics including knitting, cotton, leather, and chemical fibers. Available in three distinct configurations, this machine adapts to your specific production speed and stitch requirements.

Compatible Materials

Knitting, Cotton, Leather, Chemical Fibers
