

High-Speed Lockstitch Sewing Machine for Varied Materials

This high-speed lockstitch sewing machine is designed for use with various material thicknesses, including leather, knits, cotton, and chemical fibers. It features a reversed level feed system and automatic lubrication.

Overview

High-Performance Lockstitch Solution

The GC28 series high-speed lockstitch sewing machine is engineered for versatility and precision, handling a wide range of materials including knitting, cotton, leather, and chemical fibers. Featuring an advanced reversed level feed system and an automatic lubrication mechanism, this machine ensures consistent stitch quality and operational reliability. With multiple models available to suit light, medium, and heavy-duty applications, it is an ideal choice for diverse industrial sewing needs.

Technical Specifications

Sewing Speed

3000 s.p.m.

Minimum Speed

5000 s.p.m.

Maximum Speed

Needle System

DBx1

Compatible Needle Sizes

#11, #14, #18, #22

Model Comparison

Model Specifications

Model	Material Type	Max Speed (s.p.m.)	Feed Range (mm)
GC28-1A / 3	Medium	5000	0-4
GC28-1AB / 3B	Light	4000	0-4
GC28-1AP / 3P	Heavy	3000	0-6
GC28-1AS / 3S	Heavy	3000	0-7

Features

Key Features

- Automatic lubrication system
- Reversed level feed system
- High-speed single needle lockstitch
- Suitable for various material thicknesses
