

High-Speed Lockstitch Sewing Machine with Auto Thread Trimmer

This is a high-speed, single-needle lockstitch sewing machine with automatic thread trimming and foot lifter. It is designed for efficient and precise sewing operations.

Product Overview

High-Performance Lockstitch Solution

This high-speed, single-needle flatbed lockstitch sewing machine is engineered for maximum efficiency in apparel manufacturing and textile operations. Equipped with advanced automatic thread trimming and automatic foot lifter capabilities, it streamlines production workflows while ensuring precise stitch quality. The integrated electronic control panel allows for easy pattern selection, making it a versatile tool for professional sewing environments.

Technical Specifications

Model Number	TY-891H-44-SV
Machine Type	Single-needle flatbed lockstitch
Series Identifier	C-30

Key Features

Automation Capabilities	Auto Thread Trimmer, Auto Foot Lifter
Control System	Electronic control panel

Safety & Compliance

Safety Mechanisms

- Integrated safety devices
- Main switch power-off requirement for maintenance
- Needle and bobbin safety protocols
