

High-Speed Lockstitch Sewing Machine with Edge Trimmer

This high-speed lockstitch sewing machine features an integrated edge trimmer for simultaneous sewing and trimming. It is designed for efficient and precise sewing operations across various apparel and textile applications.

Product Overview

High-Speed Precision Sewing

This high-speed single-needle flatbed lockstitch sewing machine is engineered for industrial-grade efficiency and precision. By integrating an advanced edge trimmer, the unit allows for simultaneous sewing and trimming, significantly streamlining production workflows. Its robust construction ensures long-term durability and consistent stitch quality across a wide range of apparel and textile applications.

Technical Specifications

Primary Applications

- Apparel manufacturing
- Textile production
- Industrial sewing operations

Machine Type	Single-needle flatbed lockstitch
Integrated Features	Edge Trimmer, High-Speed Performance, Industrial Grade
