

High Speed Metal Band Saw

This high-speed band saw is designed for precise metal cutting. It features a robust frame, advanced control panel with digital display, and a hydraulic clamping system.

Overview

High-Performance Cutting Solution

The C-33 High Speed Band Saw is engineered for precision metal cutting across a wide range of industrial applications. Featuring a robust frame and advanced digital control interface, it ensures consistent accuracy and operational stability. With integrated hydraulic clamping, variable speed control, and a dedicated coolant system, this machine is designed to maximize blade longevity and cutting efficiency for professional workshops.

Technical Specifications

Model	C-33
Control Interface	Digital Display Panel
Clamping Mechanism	Hydraulic
Speed Adjustment	Variable Speed

Features & Safety

Build Quality	Robust Frame
Safety Systems	Emergency Stop, Blade Breakage Detection
Cooling System	Yes
